1. Introduction

This document outlines the implementation of optics concepts using Python...

2. Optics Basics

This section on Optics Basics does what it says on the tin. Here, I will introduce basic optics concepts in a way that is applicable to those without any Physics knowledge and targeted as a resource for teaching children ages 9+ about Optics.

2.1. What is light?

2.2. Reflection

2.2.1 Reflection Theory

2.2.2 Reflection Simulation

2.3. Refraction

2.3.1 Refraction Theory

2.3.2 Refraction Simulation

2.4. Lenses

3. Intermediate Optics

4. Advanced Optics

4.1. Fourier Optics

5. Optics Even I Don't Understand

6. References
